

# Starting Geography

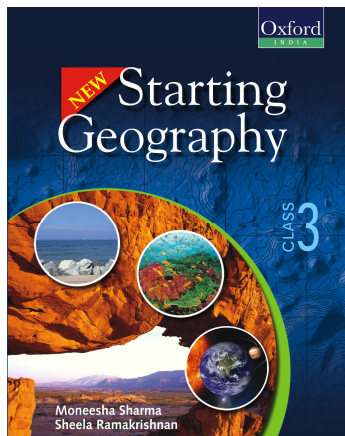

Innovatively designed, these books introduce young learners to geography in an easy, fun-filled manner.

Using an activity-based approach, the series helps the learners to develop essential geographical concepts and skills, which are in keeping with the ICSE syllabus guidelines.

With its emphasis on learning by doing, it succeeds in making the study of geography a lively and meaningful experience for young learners.

## Key Features

- The series provides a strong foundation for later learning by explaining the basic concepts methodically
- Contains carefully structured units and graded language
- Enlivens the subject through a child-friendly layout with colourful illustrations, accurate maps and appropriate diagrams
- Links geography to the child's environment
- Presents snippets of interesting information through Did You Know
- Correlates fun-filled exercises and Things To Do which encourage students to learn through self-discovery
- Provides ample exercises for the reinforcement of knowledge
- Includes Let us remember for easy recapitulation
